PMB Investment introduces its first global equity fund

According to PMB Investment Bhd CEO Mahani Ibrahim, the wholly-owned subsidiary of Pelaburan Mara Group, has launched its maiden global equity fund that caters to investors seeking capital growth over the medium to long term. The PMB Shariah Global Equity Fund (PMBSGEF) provides investors access to an actively managed portfolio of global shariah-compliant securities. The fund's minimum initial investment is RM1,000 for individual investors and RM10,000 for institutional investors, while the minimum additional investment is RM100 and RM1,000 respectively. The fund invests up to 99.5% of its net asset value (NAV) into shariah-compliant global equities and related securities in more than 15 countries including the US, United Arab Emirates, China and Japan. PMB Investment is partnering with Nasdaq Dorsey Wright, a leading advisor to Wall Street and investment managers worldwide, to manage the fund using its proven methodologies and investment strategies. PMB Investment believes the fund offers an attractive opportunity for Malaysian investors looking to ride on the recovery trend on shariah-compliant investments.

Agrobank, MAFI announce RM110 mil financing campaign for SMEs, micro agropreneurs

According to Ministry of Agriculture and Food Industries (MAFI) Minister Datuk Seri Dr Ronald Kiandee, Agrobank in collaboration with MAFI, has allocated RM110 million fund to support small and medium enterprises (SMEs) and micro agropreneurs. The fund had been allocated through a financing campaign called Dana Agromakanan Keluarga Malaysia in line with the Keluarga Malaysia (Malaysian Family) concept. The fund was set up to ensure the sustainability of agricultural and food industries while also stimulating economic growth. The launch of this campaign coincides with the National Agrofood Policy 2021-2030 (DAN 2.0), which aims to drive the development and modernisation of agro-food industries for the next 10 years, and Agrobank has pledged to continue supporting the DAN 2.0. It will be channelled through two of Agrobank's financing programmes. The first is Agromakanan (PENJANA), which includes financing assistance for entrepreneurs under microenterprise and the B40 group with a total fund of RM50 million, maximum financing up to RM50,000 and profit rate as low as 3.5% per annum. The second is the Dana Pembiayaan Agromakanan (DPA) financing, specifically for agropreneurs in the food industry to increase local production and reduce imports with a total fund of RM60 million. The financing offer is up to RM10 million with a profit rate of 3.5% per annum (RM10,000-RM5 million) and 4.75% per annum (RM5 million-RM10 million). The bank will waive the guarantee fee for both Agromakanan (PENJANA) and DPA funds during the campaign period. The campaign is valid until the RM110 million is fully utilised or up to Dec 31, 2021, whichever comes first.

DHL to invest RM200m to build auto-sort gateway at KLIA by 2023

According to DHL Express Malaysia and Brunei managing director Julian Neo, the global logistic provider plans to invest RM200 million to build its first fully auto-sort gateway at Kuala Lumpur International Airport (KLIA) by the first quarter of 2023. Located at KLIA Air Cargo Terminal One (KACT1), the 13,422 square metre gateway will nearly triple the size of its current facility in KLIA. The Kuala Lumpur Gateway will be equipped with state-of-the-art technologies and designed for optimal shipment processing efficiency, including a high-speed dimensioning and weighing system. There has been a significant rise in import and export volumes in Malaysia and the fully auto-sort gateway will enable DHL to manage the increasing growth of shipment and parcel volume. The facility will be equipped with an automated sort system that can handle 10,000 packages per hour, 24 hours a day, as compared to the current 2,400 packages per hour. The new gateway will have two dedicated aircraft flying five times a week to

and from Hong Kong, and four times a week to and from Singapore. The move coincides with the Malaysian Transport Ministry's efforts to upgrade Malaysia as a transport and logistics hub in the region by 2025.

RAM Ratings: Banking sector not out of the woods yet, but remains resilient

According to Wong Yin Ching, RAM Ratings' co-head of financial institution ratings, the Malaysian banking sector is expected to stay resilient in 2022 amid the challenges of the Covid-19 pandemic. Even as impairments begin to surface in the coming year, credit losses will be amply cushioned by healthy earnings accretion, comfortable provisioning buffers and solid capitalisation. In the next 12 months, most ratings in RAM's banking portfolio will remain intact. RAM also projects loan growth to come in at 4% in 2022, in line with the anticipated economic recovery. This is a higher rate than the 3% forecasted for 2021 and the 2.5% recorded in August. The household sector will anchor growth next year with mortgages as the main driver, similar with what was seen in previous years. This is not surprising as Malaysia has a young demographic where household formations are high and there is an underlying demand for homes. For business, on the other hand, RAM is only projecting a slight pick-up as most firms are currently operating below capacity. Even as the economy gradually recovers, they do not see firms rushing to invest or expand just yet.

Meanwhile, RAM senior analyst Loh Kit Yoong added that funding and liquidity conditions are envisaged to stay healthy. Banks' liquidity coverage ratio has generally hovered around 150%, well above the 100% minimum. They believe that Bank Negara Malaysia (BNM) has a strong incentive to ensure ample liquidity in the financial system; the many regulatory flexibilities introduced since the onset of the pandemic is a testament of that. Although most banks will likely extend further relief to borrowers who are still viable when the nationwide opt-in moratorium expires in the first half of 2022, RAM expects some impairments to start crystallising in the latter part of the year. As such, RAM projects the gross impaired loan ratio to rise to between 2.3% and 2.5% in 2022 from the current 1.7% that has been contained by wide-ranging loan repayment assistance and moratorium. As at end-July 2021, about 30% of total loans were under relief. Based on discussions with some banks, majority of their borrowers under relief stemmed from the middle- and higher-income brackets. They are of the view that a sizeable portion of borrowers had taken the moratorium as a precautionary measure, given that bulk of these relief loans actually have zero arrears. As banks have set aside sizeable forward-looking provisions and management overlays in 2020, RAM foresees banks' average credit cost ratio to ease to between 50 and 60 basis points (bps) next year, from the expected 60 to 70bps for 2021. While hopeful of an economic rebound in 2022, the banking sector is not out of the woods yet. That said, banks went into the Covid-19 pandemic from a position of strength. RAM believes the sector will remain on solid footing amid our nation's protracted recovery

Eye On The Markets

This week, on Friday (29Oct), the Ringgit opened at 4.1560 against the USD from 4.1535 on Monday (25Oct). Meanwhile, the Ringgit was 3.0795 to the Sing Dollar on Friday (29Oct). On Monday (25Oct), the FBM KLCI opened at 1586.77. As at Friday (29Oct) 10:00am, the FBM KLCI is down 17.39 points for the week at 1569.38. Over in US, the overnight Dow Jones Industrial Average closed up 239.79 points (+0.68%) to 35,730.48 whilst the NASDAQ added 212.30 points (+1.39%) to 15,448.10.

A Robust 2022 GDP Growth Expected

Markets

Both the Japanese and European Central Bank maintained their monetary policy this week and left key benchmark rates unchanged. For Japan, the central bank does not see inflationary pressure at all and lowered its forecast this year to zero from 0.6% previously. Locally, Fitch Solutions Country Risk and Industry Research (Fitch) raised Malaysia's GDP forecast to 1.5% this year from zero previously as the opening up of the economy following the strong rate of vaccination and reduced number of Covid-19 cases is seen as positive. For 2022, Fitch maintained its outlook with a projected growth rate of 5.5%.

Economy

Out of the US, 3Q GDP data released last night showed the US economy expanded slower than expected with a growth of just 2.0% y-o-y, against the market's forecast of a 2.6% growth and the preceding quarter's expansion of 6.7%. The slower than expected data was a result of a slowdown in consumer spending as well as the impact from the resurgence of Covid-19 cases, which forced delays in the reopening of businesses in some parts of the country. However, other US economic data that were released this week were mostly above forecast. Existing Home Sales remained strong as the data for September saw a 7% rebound to an annualized rate of 6.29mil units, beating market expectations of a 3.6% gain. New Home Sales too came in stronger than expected as the September monthly data rose by 14% y-o-y to an annual rate of 800,000, beating the market's forecast of 760,000. Meanwhile, the Conference Board's US Consumer Confidence for October surprised the market with a reading of 113.8, an increase of four points from last month's print of 109.8, and well above consensus expectations of 108.0.

In other data points, although the headline Durable Goods Order for Sept fell by 0.4% m-o-m, the orders for core capital goods increased 0.8%, reflecting the strength of the underlying business environment. Meanwhile, the US trade deficit widened to US\$96.3bil in Sept from US\$88.2bil in the preceding month. Export for Sept declined by 4.7% m-o-m to US\$142.2bil while imports rose by 0.5% m-o-m to US\$238.4bil.

Out of Europe, the IHS Markit Flash Eurozone Purchasing Managers Index (PMI) Composite Output Index and the Flash Eurozone Manufacturing PMI registered readings of 54.3 and 58.5 against 56.2 and 58.6 in the preceding month respectively.

From Asia, South Korea reported a slower than expected growth in its 3Q GDP as the economy expanded by just 4% y-o-y against the forecast of a 4.2% increase, and the preceding quarter's 6% growth. Down south, inflationary pressure is also building up in Singapore as the city-state headline and core inflation for September increased to 2.5% y-o-y, driven mainly by a jump in rentals, while core inflation expanded by 1.2% y-o-y.

Locally, Malaysia's September inflation reading picked up a few notches as the headline Consumer Price Index (CPI) rose by 2.2% against the preceding month's print of 2% while core

inflation reading remained stable at 0.6%. Meanwhile, Bank Negara reported that Malaysia's international reserves as at Oct 15, 2021, rose by 0.3% or US\$0.4bil to US\$115.6bil or RM484.156bil, a new record high in Ringgit terms.

In other news, Malaysia's Producer Price Index (PPI) local production for Sept accelerated to 12.3% from 11.3% in the preceding month as the Agriculture, Forestry & Fishing Index and the Mining Index jumped 24.8% and 68.1% y-o-y respectively. Malaysia also reported external trade data for Sept on Thursday which saw exports and imports rising by 24.7% and 26.5% to RM110.8bil and RM84.7bil respectively. Trade balance for the month too increased by 19.1% to RM26.1bil. For the first nine months of 2021, Malaysia's exports surged 24.9% to RM889.3bil while imports rose by 21.1% to RM713bil, resulting in a total trade surplus of RM176.3bil, up 43.1% y-o-y.

Corporate

Last Friday, AME Elite Consortium announced that it had won a RM359mil job to build a 2.5mil square feet new integrated production facility, logistics warehouse, and office buildings for Ye Chiu Non-Ferrous Metal. In other news, Serba Dinamik Holdings (SDH) has denied that its directors were given factual finding updates by Ernst & Young as at Oct 22, 2021. According to the company, the Special Independent Review (SIR) is still ongoing. Nevertheless, Bursa Malaysia in a statement on Oct 27 reiterated that trading in the SDH's shares will remain suspended as the company has not complied with the directive to announce the findings from the SIR. Meanwhile, SDH's proposed extension of time of one month until November 30, 2021, to issue the company's annual report for the financial year ended June 30, 2021, has been approved by Bursa Malaysia. In related news, SDH's sister company, Sarawak Consolidated Industries Bhd (SCIB) application to Bursa Malaysia for an extension of time to release the company's annual report until Dec 31, 2021, was rejected by the regulator. SCIB has made an appeal and should that be rejected, trading in the company's shares will be suspended on Nov 9, 2021. The company also aborted the planned share placement exercise of 91.43mil shares.

In a rare move, Supermax Corporation has issued a profit warning as it sees "material effect" on its financials due to the US Customs and Border Protection's (CBP) issuance of the Withhold Release Order against the company. This as exports to the US makes up some 20% of sales and if the company is unable to divert glove products to other markets. In other news, Top Glove Corporation announced that it has resubmitted its proposal to list on the Hong Kong Exchange and Clearing Limited (HKEX). The listing exercise will allow Top Glove to raise gross proceeds of between RM1.97bil and RM2.27bil on the assumption that up to 793.5mil new Top Glove shares are issued.

In a land deal, Sime Darby has agreed to sell some 760.1 acres of landbank located in Labu, Negri Sembilan, which forms part of the Malaysian Vision Valley (MVV) to its sister company, Sime Darby Property for RM280mil. Sime Darby will recognize a gain of RM250mil from the sale.

Equity

World equity markets closed mostly mixed to lower as markets that rose saw gains of between 0.1% and 1.2%, while markets that fell witnessed losses of between 0.3% and 2.1%. Locally, the KLCI closed the week on a negative note with the KLCI giving up 24.76 pts to close at 1,566.86 pts on sustained selling pressure among key index stocks after the recent gains and ahead of the tabling of Budget 2022 later today. For the week ended Oct 27th, retailers turned biggest net buyers with an inflow of RM269.8mil, followed by foreign net inflow amounting to RM205.8mil, leaving local institutions as net sellers with an outflow of RM475.6mil.

Eye on Week Ahead

The EU will be reporting its preliminary 3Q GDP data later today with the market looking at a growth rate of 3.5% y-o-y. Out of the US, key data will be the headline and core Personal Consumption Expenditure (PCE) for Sept with consensus expecting a reading of 4.7% and 3.7% respectively.

On Sunday, Oct 31st, China will release both the official manufacturing and non-manufacturing PMI for Oct with market expectations of 52.9 and 49.7 print respectively. On Monday, Nov 1st, the Institute of Supply Management (ISM) Manufacturing PMI is due with the market looking at a 60.4 print for October. On the same day, the Euro Zone IHS Markit October Manufacturing PMI too will be out with an expected reading of 58.7. This will be followed by the October JP Morgan Global Manufacturing PMI on Tuesday, Nov 2nd. The next key data is the October ISM Services PMI, which will be out on Wed, Nov 3rd. Consensus is expected the data to show slight weakness at 61.5 against the preceding month's reading of 61.9. On the same day, the Federal Open Market Committee (FOMC) will also decide on key US Fed Fund Rate, which market does not expect any change for now, but attention will be on the choice of words used by the Fed in its policy statement with respect to recent bond yield movements and inflationary pressures. On Thursday, Nov 4th, the two key data are the October IHS Markit Eurozone Composite PMI and the October JP Morgan Global Composite PMI.

Locally, the Minister of Finance will present Budget 2022 later today with high expectations that Malaysia will table another expansionary budget and robust GDP growth of between 5-6% for next year. Later today, Bank Negara will also be releasing the Sept banking statistics data while on Nov 3rd, all eyes will be on the central bank's final Monetary Policy Committee (MPC) meeting for the year with expectations that the current Overnight Policy Rate will be left unchanged at 1.75%. However, given the rise in bond yields globally, the central bank may turn mildly hawkish in its outlook, especially based on expectations that economic growth will be stronger next year. Other data to be out next week include the IHS Markit Malaysia Manufacturing PMI for October on Nov 1st, followed by the HIS Market ASEAN Manufacturing PMI the next day.

ESG concerns weigh on plantation stocks prices

That there is disparity or disconnect between share price performance of Bursa Malaysia-listed plantation stocks and crude palm oil (CPO) price is a good tell-tale sign that undermining ESG (environmental, social and governance) considerations can be detrimental to stock valuations in the long term. What this means is simply that the plantation industry may be experiencing a joyride with CPO prices surging to record-high levels – which would contribute positively to the revenue stream, earnings and even dividend yields of public listed plantation companies – but sadly little is reflected in their share prices.

As it is, the KL Plantation Index remains muted or has not reacted positively to the upswing in CPO futures prices despite the CPO price for October 2021 climbing past RM5,000/metric tonne to an all-time high of RM5,050 during the intraday trade on 6 October 2021. At of 20 October, the CPO futures contract for November 2021 climbed RM125 to RM5,300/metric tonne; December 2021 futures surged RM134 to RM5,177/metric tonne and January 2022 futures increased RM127 to RM5,071/metric tonne. The rise in CPO is backed by numerous bullish factors, notably tight supplies and strong demand from China which is currently in an energy supply crisis. As such, analysts expect the country may increase its intake of palm oil for biofuel.

Other notable reasons include the outlook for lower inventories in Malaysia, sturdy demand and concerns that production by top growers may fall short of expectations (given the labour supply constraints) and economies reopening following lifting of COVID-19 lockdowns, boosting food and fuel consumption of edible oils. In contrast, although the KL Plantation Index (KLPI) has spiked 8% to 6,917.23 points on 6 October (from 6,404.24 on 5 October), the index has not truly reflected the current bullish CPO price. The jury is still out as to whether the CPO price rally is sustainable or otherwise. From a two-year peak of 7,779.07 on 2 January 2020, the KLPI had hit the rock bottom on 19 March 2020 at 5,532.03, a day after the imposition of the first Movement Control Order (MCO 1.0). But it gradually picked up soon after to a recent high of 7,483.12 on 13 January 2021 prior to consolidating again with a downward bias. All-in-all, the index has retreated 4% year-to-date (YTD) to 7,027.47 points as of 20 October 2021 from 7,329.50 on 4 January 2021 despite breaking out from 6,324.49 on 4 October 2021.

ESG concerns

Given the substantial buying interest in plantation counters from foreign funds, many market observers opine that these ESG-conscious investors have already priced their concerns into their investment decisions. As greater scrutiny is piling upon this sector especially from the forced labour and environmental destruction fronts, it is common for analysts and investors to impose ESG discounts which can range from 15%-35% on their plantation stock valuation (research houses have in recent times introduced ESG star rating which commensurate with the ESG score of the industry players). To put it bluntly, should foreign investors sell off their plantation

holdings, valuations may 'de-rate' even further.

"We believe ESG will remain a dampener on valuations for the medium term, at least until some of the big-cap players are able to work through their forced labour issues," opined RHB Research analyst Hoe Lee Leng in a regional plantation sector update dated 13 September 2021. The research house has maintained its "underweight" outlook on the sector as it expects the ESG discount, which is holding back share price performance, to remain prevalent.

Meanwhile, in a sector outlook dated 7 September 2021, Hong Leong Investment Bank Research analyst Chye Wen Fei observed that despite recent recovery in share prices, the performance of plantation companies (as represented by KL Plantation Index) still lags behind CPO price rally due to lingering ESG concerns within the sector and doubts on sustainability of CPO price. "We believe the concerns on ESG issues have already been reflected in the sector's valuations as most players (particularly, larger sized players which have been in the limelight amid ESG issues) have been putting efforts to rectify these ESG issues, and foreign shareholdings are at multi-year low level," justified Chye.

In its latest sector review dated 15 October 2021, MIDF Research noted that the local plantation sector has been facing challenges from Western countries as well as from a few acts and legislation namely the Farm-to-Fork strategy, EU (European Union) Renewable Energy Sources Directive (RED) and the EU Policy on Forests & Deforestation. "We can see that our biggest importers are India and China but it is interesting to note that the US and Europe are the ones with the most complaints," observed analyst Shahira Rahim in a plantation sector update. "The worrying factor is the influence that the Western countries wield."

Negative market perception

Despite all the benefits that palm oil offers, MIDF Research opined that the misconception of Malaysia's palm oil industry persists despite the versatility and productivity of palm oil. In February 2021, US food company General Mills issued a global "no buy order" on FGV Holdings Bhd (FGV) and Sime Darby Plantation Bhd. Recall that both FGV and Sime Darby Plantation were banned by the US Customs and Border Protection (CBP) over alleged human rights violation last year.

Chocolate maker Hershey said its North American suppliers have removed all Sime Darby volumes in compliance with the US order. Some buyers including Nestle, Unilever and Hershey had suspended FGV since 2018 after industry watchdog Roundtable on Sustainable Palm Oil (RSPO) found "exploitative" labour practices in the company. In response to all the negative ESG perceptions, the Malaysian Palm Oil Council (MPOC) had in 2019 initiated a few new policies called Malaysia's "Green Deal" to enhance the sustainability of the palm oil industry. Among others, the policies entailed (i) capping total oil palm cultivated acreage to 6.5 million hectares; (ii) no new planting of oil palm in peatland areas; (iii) ban on conversion of forest reserves for oil cultivation; and (iv) making palm oil plantation

maps available for public access. In all fairness, while efforts have been put forth to remedy the ESG standards among the plantation players, acceptance is another matter altogether given the misperception or trade agenda that developed economies have against palm oil (i.e. to protect the interest of soybean planters).

While deforestation is one thorny issue in the palm oil industry, a new study by non-profit World Resources Institute (WRI) which looked at global satellite imagery between 2000 and 2015 found that of the 72 million hectares of lost forest – an area double the size of Germany – cattle ranching (beef industry) is responsible for 45.1 million hectares (63%) followed by palm oil (10.5 million hectares or 14.6%) and soy (7.9 million hectares or 11%). According to the Malaysian Palm Oil Council, oil palm cultivation occupies the least in terms of the world's agricultural land size at just 0.23% compared to other vegetable oils, namely sunflower (0.51%), rapeseed (0.67%) and soybean (the most at 2.14%).

It is also worthwhile to note that in terms of productivity, palm oil managed to produce 4.08 tonnes of oil yield per hectare within a year while rapeseed, sunflower and soybean only managed to produce around 0.75 tonnes, 0.60 tonnes and 0.38 tonnes respectively. Despite using the least amount of land, oil palm provides the highest yield of oil at 11 times more oil than soybean, sunflower (10 times), canola (seven times) per hectare per year. In other words, it takes more than 10 times more land to produce the same amount of soybean oil as palm oil.

Conclusion

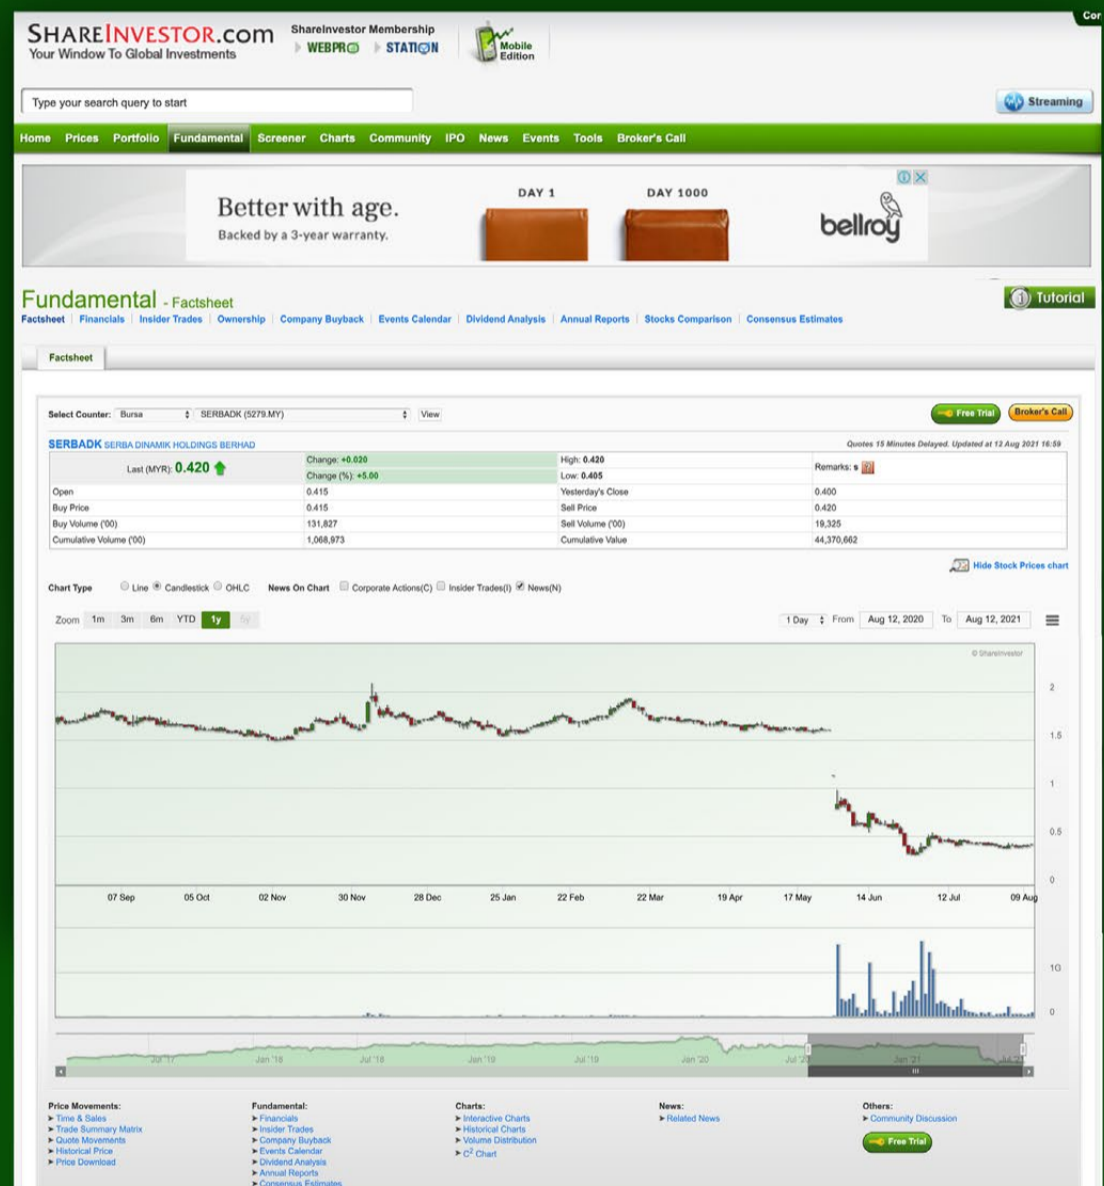

Investors are increasingly applying non-financial factors especially ESG as part of their analysis process to identify material risks and growth opportunities. Some PLCs harbour under perceptions but perceptions shape reality – unfortunately. These PLCs must work doubly hard to dispel such perceptions to allow reality to prevail. While ESG metrics are not part of mandatory financial reporting, companies are increasingly making disclosures in their annual report or in a stand-alone sustainability report. Numerous institutions such as the Sustainability Accounting Standards Board (SASB), the Global Reporting Initiative (GRI) and the Task Force on Climate-related Financial Disclosures (TCFD) are working to form standards and define materiality to facilitate incorporation of these factors into the investment process.

As ESG investing accelerates in demand, several key trends are emerging – from climate change to poor working conditions to governance standards encompassing company's leadership, executive pay, audits, internal controls, and shareholder rights. Many mutual funds, brokerage firms, and robo-advisors are now offering products that employ ESG criteria. What is obvious is that the COVID-19 pandemic has intensified the inter-connectedness between sustainability factors and the financial system. What has happened in the case of CPO price and share price of listed plantation companies is how the failure to comply with the desirable ESG standards has sparked a disconnect or disparity between both prices.

ShareInvestor is a technology based company with a focus on Internet media and we have operations in Malaysia, Singapore and Thailand. We are the market leader in providing a combination of market data, analysis and news on various platforms to traders and investors.

Our websites include www.shareinvestor.com and www.bursastation.com. More information about our products and services can be found at www.shareinvestorholdings.com

We are looking for Developers to join our team, in a challenging, yet fun and fulfilling environment. The successful applicants will leverage on the latest Internet technologies to help create financial applications and platforms for investors, listed companies and financial institutions. Fresh graduates are welcome to apply.

Interested candidates are encouraged to apply with full resume, present and expected salary and a recent photograph. Please send these to hr.my@shareinvestor.com for processing. ShareInvestor regrets that only shortlisted candidates shall be notified.

Ruby on Rails Developer

Responsibilities:

- Develop quality web-based software modules on schedule with a focus on Ruby and Ruby on Rails applications.
- Explore and utilize the latest web-based technologies.
- Document design specifications, logic concepts and module description.
- Maintain and enhance existing web-based applications.

Requirements:

- Experience in web-based programming/scripting is essential. Candidate must be able to explain clearly technical aspects of his/her past experiences and projects.
- Passion for programming and desire to learn new languages like Go.
- Good Diploma/Degree in Computer Science/Computer Engineering.
- Able to work well in a team and be able to follow documentation and coding standards.
- Knowledge in any of the following would be an added advantage
 - Ruby and Ruby on Rails Framework
 - Javascript and jQuery library
 - Go
 - Perl

Application Developer (C++/STL)

Responsibilities:

- Deliver quality software modules on schedule.
- Document design specifications, conceptions, module description.
- Maintain and enhance existing applications.

Requirements:

- Passion for programming and desire to learn.
- Good Diploma/Degree in Computer Science/Computer Engineering.
- Skills in C++ is essential.
- Experience with Visual Studio, networking stack and Golang would be an advantage.
- Proactive, resourceful and self-motivated with strong analytical skills.
- Good interpersonal, written and communication skills.
- Able to work with little supervision.

PHP Developer

Responsibilities:

- Develop web applications in PHP
- Work with Front-End Developers for integration with visuals.
- Perform R&D work based on new ideas and concepts for future requirements and enhancement.
- Use JSON and REST API's for integration
- Advise and consult on technical queries on web development.
- Present ideas and concepts internally and be creative to propose and deliver solutions
- Provide support and maintenance for all related projects.
- Be actively involved in internal discussions, brainstorm-sessions, and other meetings.

Requirements:

- Bachelor's Degree/Diploma in Computer Science; Information Technology or equivalent.
- Minimum 3-5 years of experience working with at least one of the following PHP based frameworks: Symfony, WordPress
- Experience with AWS & Containerisation (Docker, GitLab, Podman) strongly preferred.
- Proven experience developing custom modules or framework extensions
- Very comfortable integrating with 3rd party APIs
- Strong skills in PHP, MySQL, Bootstrap, HTML, CSS, Javascript/Jquery.
- Excellent communication skills to support healthy relationships with teammates and clients
- Good problem solving capabilities
- Able to showcase PHP projects which the candidate has implemented before.
- Familiar with secure coding practices

GROWTH STOCKS

Price & Total Shareholder Return (as at Yesterday)

Fundamental Analysis

Definition

A growth company is any company whose business generates significant positive cash flows or earnings which increase at significantly faster rates than the overall economy. A growth company tends to have very profitable reinvestment opportunities for its own retained earnings.

Chart Guide

Total Shareholder Return (TSR) combines share price appreciation and dividends paid to show the total return to the shareholder expressed as a percentage.
